Run Your Entire Construction Business From One Place

Estimates, invoicing, field tracking, scheduling, and profit — all in one custom platform built for construction contractors. No more juggling spreadsheets, paper tickets, and late-night bookkeeping.

Daily Field Tracking — Right From the Job Site

Your crews log the day's work from their phones — quantities, hours, and progress — the moment it happens. No more chasing paper tickets or guessing what got done. Everything flows straight into the office in real time.

Every Project, Organized and Under Control

See all your jobs in one clean view — status, progress, and what needs attention today. Each project keeps its estimates, invoices, field reports, and crew tied together, so nothing falls through the cracks.

Get Paid Faster, Track Every Dollar

Turn approved work into professional invoices in minutes. Know exactly what's paid, what's pending, and what's overdue — and handle the tricky stuff like retainage and bonds without a single spreadsheet.

Field Measurements at a Glance

Track quantities and measurements as they're reported from the field, summarized in one simple widget. Instantly see how much work has been completed versus what was estimated.

Know Your Profit on Every Job — In Real Time

See costs, revenue, and profit for each project as the work progresses — not months later at tax time. Spot the jobs making you money and the ones that need a closer look, before it's too late to react.

Plan Your Crews and Your Week With Confidence

See who's working where, and when, in one shared schedule. Keep your crews, jobs, and timelines aligned so nothing gets double-booked or forgotten.

✓ **Connects with QuickBooks and many other tools** — no double entry

✓ **Fully customized to your company** — your items, your workflow, your terms

✓ **Mobile apps with real-time translation** — the app speaks each worker's language

✓ **Affordable for small shops** — a fraction of the big-name platforms

One system. Your business, organized.
